Multisource Feedback for Competency-based Assessment

Jason R Frank MD MA(Ed) FRCPC

Director, cIMED: Centre for Innovation in Medical Education

| @drjfrank

Thank-you for letting a Canadian visit!

My city: Ottawa

Who I Am

- Emergency Physician
- Educator for 30 years
- Work on competency-based medical education
- Father of 4 boys
- Play ice hockey

Who Are You?
Why Did You Choose This Session?

Today...

1. What is assessment?

2. What is competency-based assessment?

3. What is multi-source feedback?

1. Introduction: Assessment of Competence

Jason R Frank MD MA(Ed) FRCPC

Director, cIMED: Centre for Innovation in Medical Education

| @drjfrank

—

What Does
“Assessment”
Mean to You?

- **Assessment** = a systematic judgment about an individual
- **Evaluation** = a systematic judgment about a program

How Do We Know Someone is Competent?

“Competence” ...

Consistently able
to demonstrate
the abilities for
the next stage of
career

What
Assessment
Methods Are
You Using
Now?

2 Approaches to Assessments...

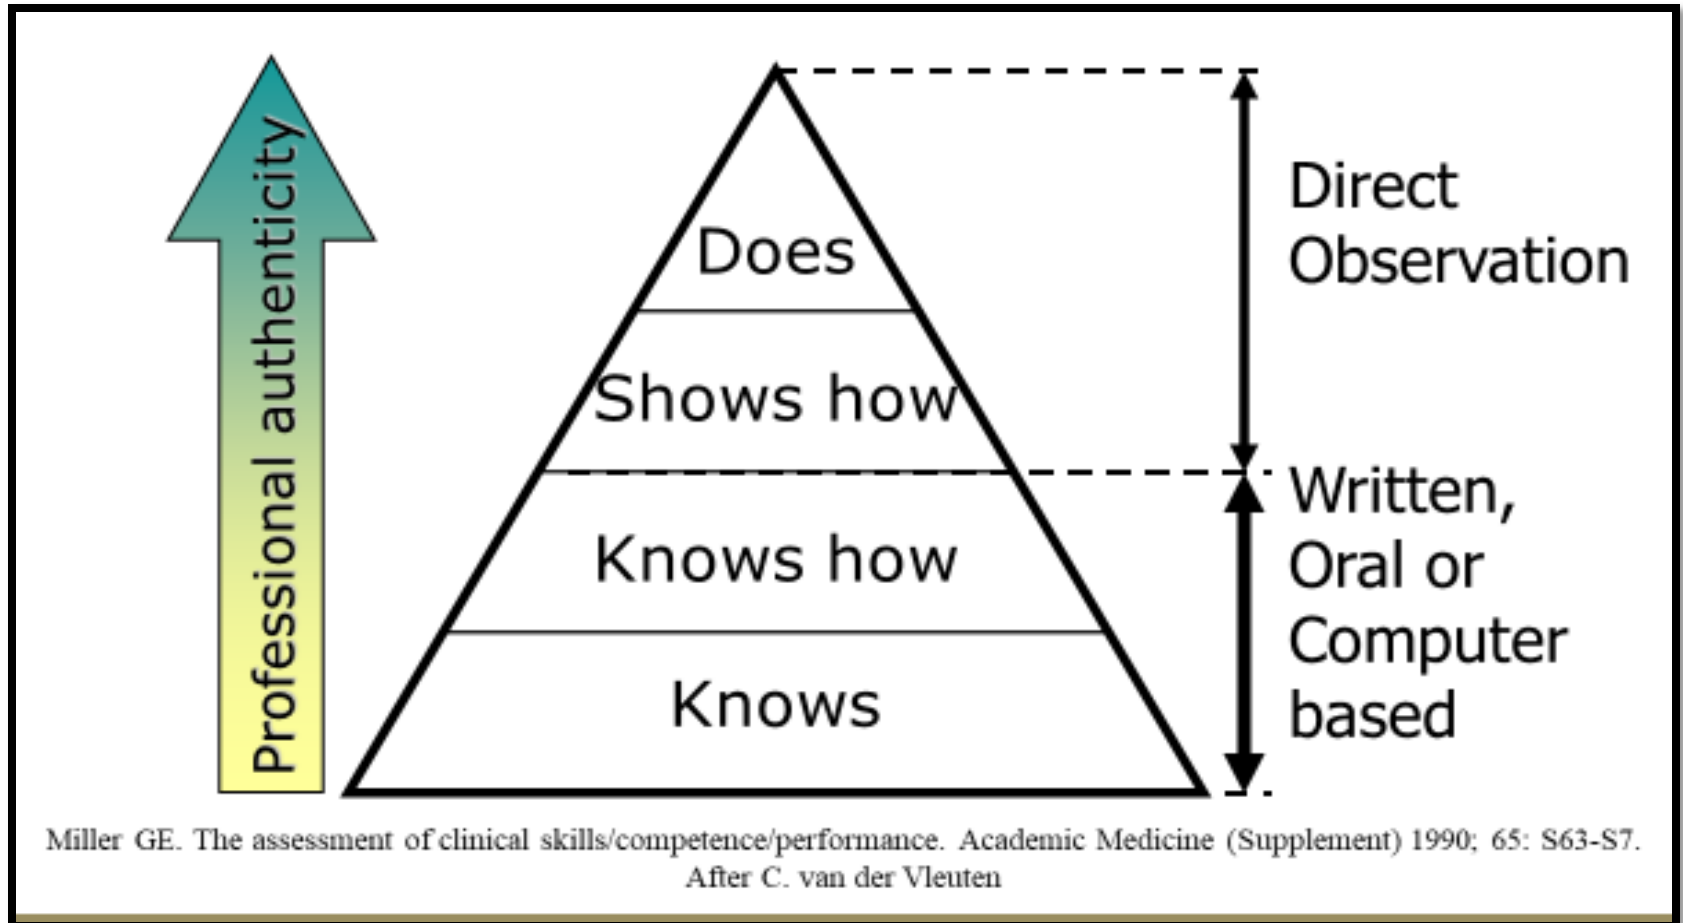

Observe

Or

**Ask a
Question**

Levels of Assessment

Good Practices in Assessment...

- Multiple assessments
- Multiple methods
- Direct Observation
- Documented
- Mapped to a “blueprint” for the whole program

What Are Some
Changes to Your
Assessments You
Would Like to Make?

2. Competency-based Assessment

Jason R Frank MD MA(Ed) FRCPC

Director, cIMED: Centre for Innovation in Medical Education

| @drjfrank

What is “Competency Based Medical Education” (CBME)?

...an outcomes-based approach to the design, implementation, assessment and evaluation of an education program using an organizing framework of competencies

Calls for Competency-Based Education (1978)

Competency-based Education:

1. “What are the abilities needed of graduates?”
2. “How can we sequence from novice to expert?”
3. “How can we enhance teacher-trainee interaction?”
4. “What learning activities are really needed?”
5. “How can we use best practices in assessment?”

ICBME Core Components of CBME

1. Defined outcome competencies for graduates
2. Designed sequence of progression
3. Tailored learning experiences
4. Teaching focused on competencies
5. Programmatic assessment

-Van Melle 2019 Acad Med

How Have
You Used
CBME
Principles?

“Programmatic Assessment”

- Blueprint for all assessments
- Many assessments over time
- Many assessors
- More direct observation
- Feedback in the moment
- Assessments collated
- Decisions on learner by a committee

Implementing CBME in Canadian Training

Jason R Frank MD MA(Ed) FRCPC

Director, cIMED: Centre for Innovation in Medical Education

A Shift to Outcomes

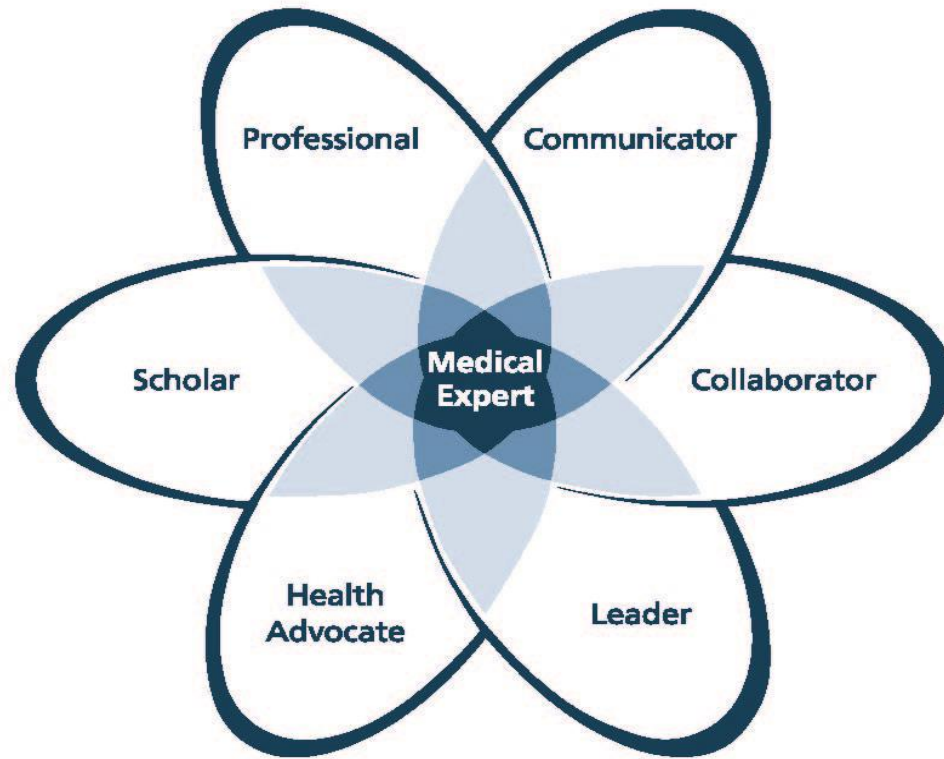

- New CanMEDS Competencies
- Stages of Development
- Programmatic Assessment
- EPAs & Milestones
- Exam Timing
- Growth Mindset
- Time-variable
- New Accreditation

CBD^{1,2} Competence Continuum

¹ Competence by Design (CBD)

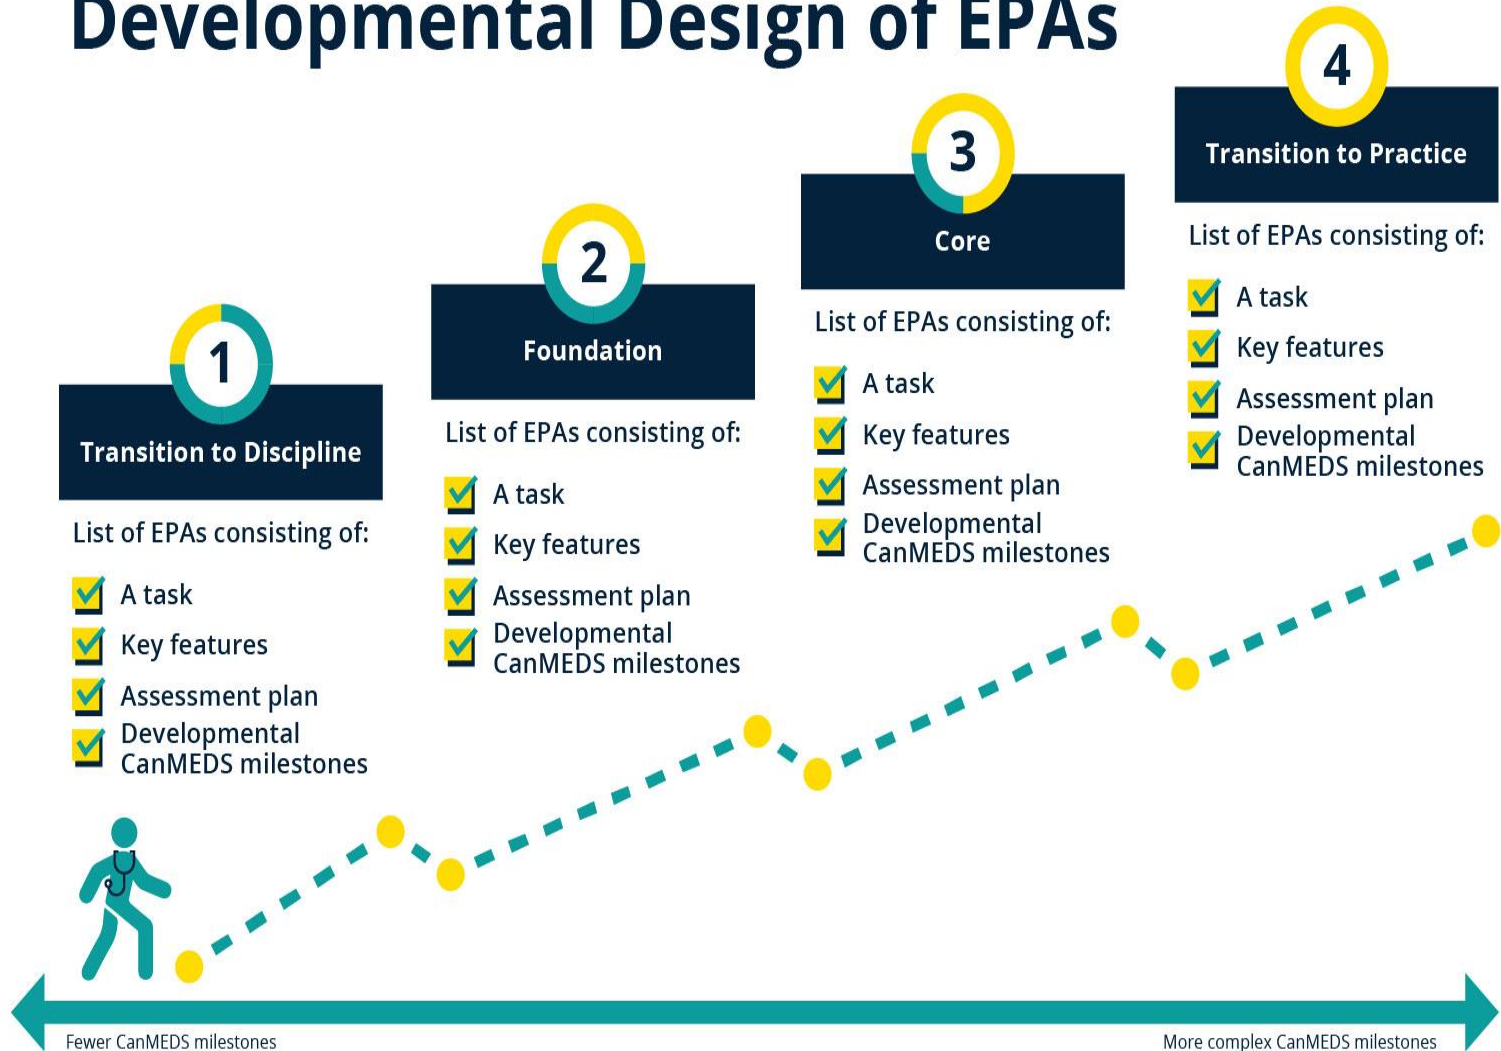

² Milestones at each stage describe terminal competencies

CANMEDS

Competency Framework

Developmental Design of EPAs

Using the Key Tasks (EPAs) to organize training

More observations the better

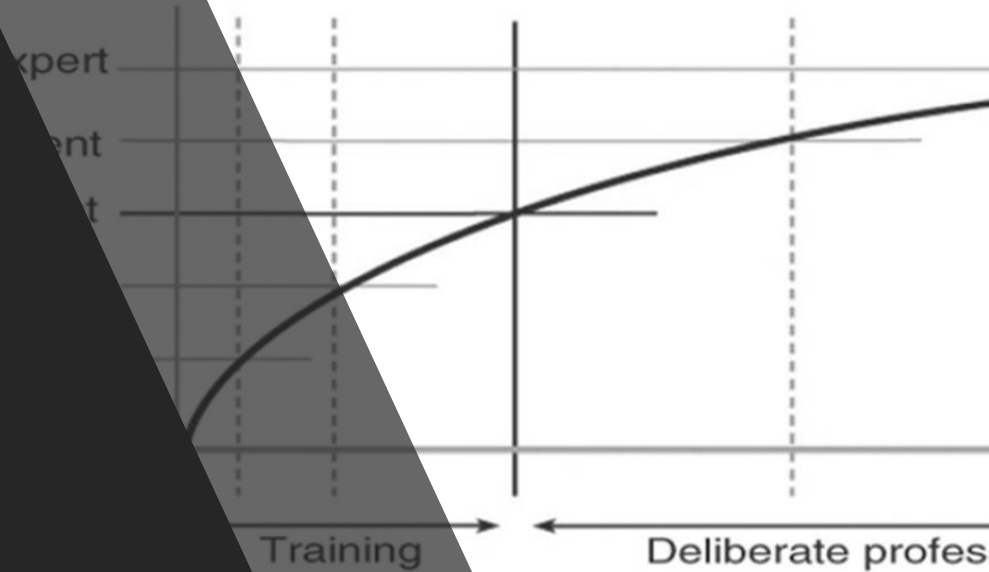

A photograph of four healthcare professionals in a meeting. A woman in a white lab coat with a stethoscope is the central focus, holding a tablet and looking towards a man in a white lab coat on the right. To her left, a woman in a dark blue suit is seen from the back, and a man in a dark suit is partially visible. They are seated around a conference table with a laptop and a telephone. The text 'The role of a Competence Committee' is overlaid in white on the image.

The role of a Competence Committee

Practical Guide to the **Evaluation
of Clinical
Competence**

Multi-Source Feedback: 4 Steps

Goal: collect information on the observable workplace behaviour of an individual from multiple perspectives.

1. Collect data using questionnaires
2. Data aggregated anonymously and with confidentiality
3. Report returned to the individual
4. Debriefing and coaching

What Domains
of
Competence
is MSF Good
For?

CANMEDS

Multi-Source Feedback...

Can be used for
any domain

Especially useful
for professionalism
and collaboration

CANMEDS

Who Are the Observers?

- Depends on setting
- Usually: peers + any other health professionals they interact with
- Patients?
- Self-assessment?

MSF Instruments

- Items related to domains of interest
- Rating scales
- Paper or digital

Compared with Physicians I Know, This One	1 = Among the Worst	3 = Average	5 = Among the Best	UA
Communicates effectively with patients.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Is available for consultation about mutual patients.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Writes hospital orders clearly.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Is courteous to coworkers.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Data is Aggregated and Prepared

Debriefing and Coaching

Assessment vs Learning

MSF Risks

- High stakes = 20-50 observers needed for high reliability
- Interpersonal conflict
- Non-expert input
- High effort
- Harm from poor debrief and coaching

- 
1. Who would you want to use MSF for?
 2. What domains of competence?
 3. Which observers?
 4. How will you collect the questionnaires?
 5. What is the minimum number to be useful?
 6. How will you create reports?
 7. Who will debrief and coach?
 8. How will the data be used for assessment?

Today...

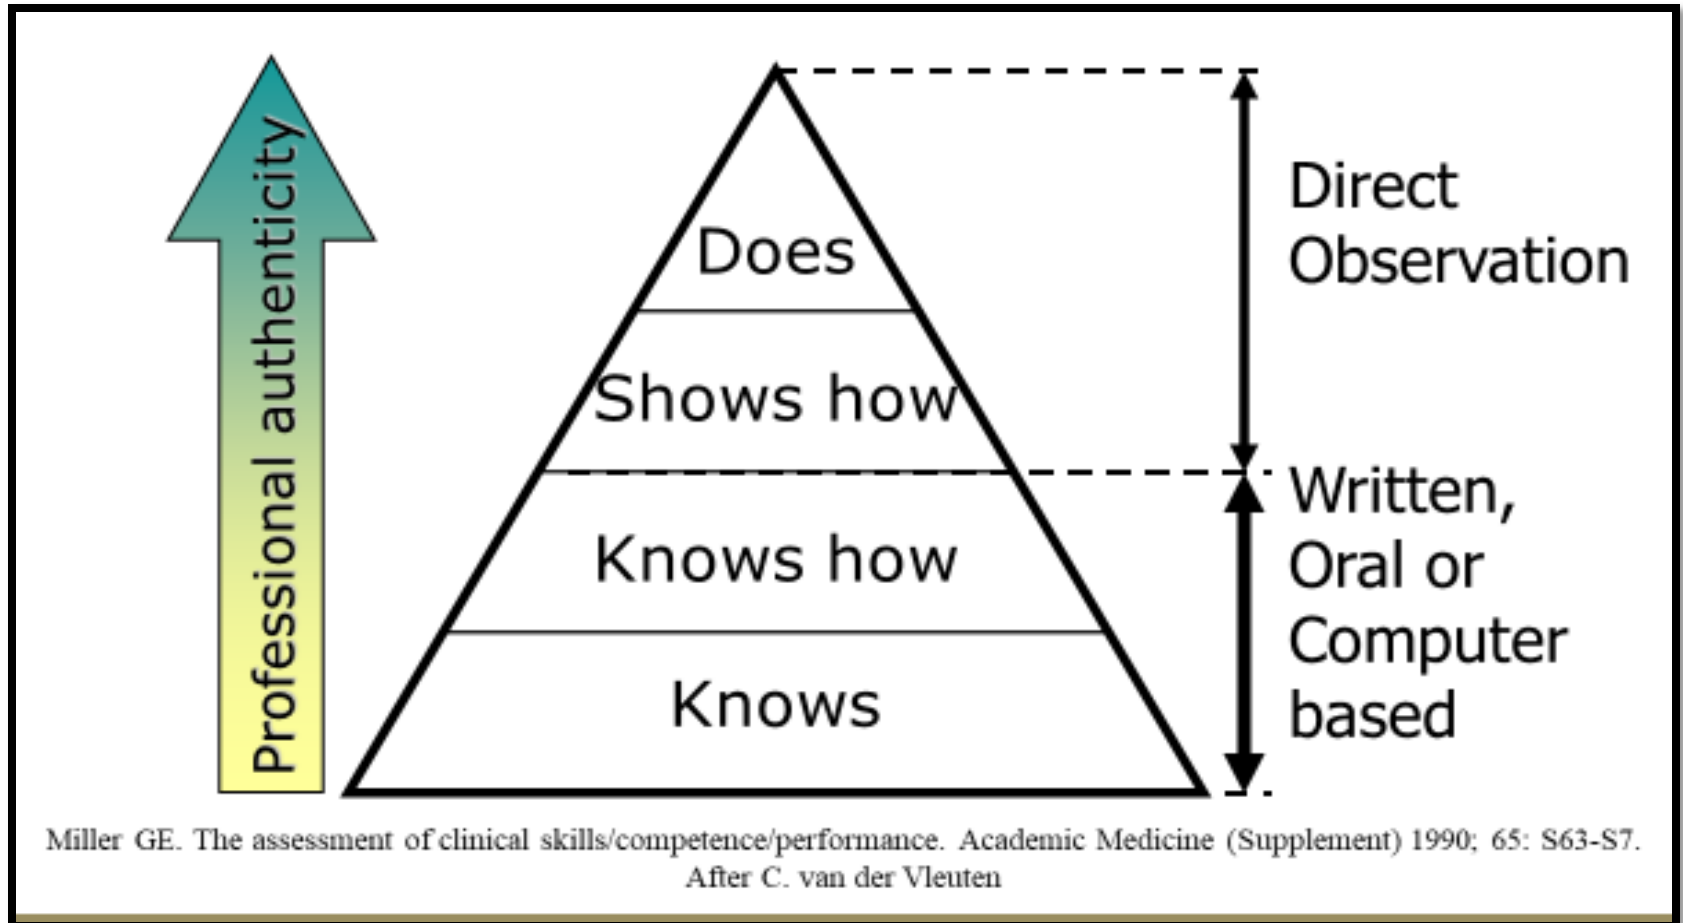

1. What is assessment?

2. What is competency-based assessment?

3. What is multi-source feedback?
